**Subject:** RE: Examiner Amendment to Drawing

I'll go ahead and send a first office action. So we don't get confused.

Hi Michael,

Regarding your question, could our claims be based upon FIGS. 3 and 9 in which the shielding plates (50) are respectively located between every adjacent two lines (44)? If you have any further questions, please contact me for further discussion. Thank you.

Regards,

Joseph Chung

Examiner Amendment to Drawing Subject:

06/07/2004 05:43

AM

Continuation application 10/771487 is ready for allowance on the claims,  
but is missing a drawing. None of the drawings show the claimed limitation  
of a shielding plate between every adjacent two lines. We could add  
drawing 4a showing a plate between two of the lines. I could red pen onto  
figure 4 a shield plate between two of the lines. We can call this drawing  
figure 4a and I'll revise the specification drawing section?
